PROFESSIONAL EXPERIENCE

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS), DISTRICT 4 <i>Fairfield, CA</i> <i>Analyst II, Business & Data Analyst</i>	Jan 2026 – Present
○ Led requirements gathering sessions and stakeholder workshops with field operations, maintenance teams, and executive leadership to define project scope and prioritize initiatives supporting District 4 operations. ○ Owned backlog refinement, sprint planning, and requirements traceability for cross-functional automation projects, translating business requirements into epics, user stories, and development-ready specifications. ○ Performed current-state and future-state process analysis to identify automation opportunities, reducing manual reporting effort by approximately 12 hours per week. ○ Developed SQL-based data profiling and analysis solutions supporting resource allocation decisions across maintenance regions serving the San Francisco Bay Area. ○ Partnered with 50+ stakeholders to align reporting, analytics, and process improvement initiatives with operational objectives and performance targets. ○ Designed and implemented Power BI, Power Automate, and Power Apps solutions that improved visibility into operational KPIs and supported data-driven decision-making.	

KEYBANK*Brooklyn, OH**Service Specialist I***Jul 2025 – Jan 2026**

- Analyzed customer financial profiles, lending data, and risk indicators to support accurate credit and lending decisions while ensuring compliance with banking policies.
- Investigated transaction patterns and collaborated with fraud prevention teams to identify potential risks and escalate suspicious activities.
- Performed root cause analysis on customer account issues, resolving discrepancies and improving service delivery through data-driven problem-solving.

ASHLAND UNIVERSITY*Ashland, OH**Business Intelligence & Data Analyst***May 2023 – May 2025**

- Facilitated requirements discovery sessions with academic and administrative stakeholders to document business rules and reporting requirements for enterprise reporting initiatives.
- Authored user stories, acceptance criteria, and functional specifications supporting development of retention, graduation, enrollment, and institutional effectiveness dashboards.
- Conducted gap analyses between existing reporting processes and stakeholder requirements, recommending scalable Power BI solutions that replaced manual reporting activities.
- Designed and deployed enterprise dashboards analyzing 25,000+ student records, enabling leadership to monitor enrollment trends, retention rates, and institutional KPIs.
- Developed predictive enrollment forecasting models in R using historical enrollment data, providing leadership with actionable projections for strategic planning.
- Led User Acceptance Testing (UAT) activities, validating business rules and ensuring reporting outputs aligned with stakeholder expectations.

CRICKET WIRELESS / DELPHOS WIRELESS*Ohio**Retail / Territory Sales Manager***Feb 2021 – Apr 2023**

- Analyzed territory performance data and business KPIs to identify sales trends, operational risks, and growth opportunities across multiple locations.
- Developed recurring performance reports and dashboards that improved visibility into promotional effectiveness and territory-wide results.
- Conducted performance reviews and variance analyses to identify gaps between actual and target results, enabling timely corrective actions.
