

OLUTOBI D. ADEKOYA

Business Analyst

Cleveland, OH | (567) 284-0709 | olutobiadekoya@gmail.com | linkedin.com/in/adekoya-olutobi

PROFESSIONAL SUMMARY

Business Analyst with a STEM-designated MBA in Business Analytics and six-plus years bridging business needs and technical delivery across government, higher education, and financial services. Combines qualitative stakeholder discovery with quantitative analysis in Power BI and Tableau, integrating data across business functions. PL-300 certified and Six Sigma Green Belt, with a record of automating manual work into decision-ready analytics.

CORE SKILLS

Requirements Gathering & Documentation | BRD | User Stories & Acceptance Criteria | Gap Analysis | Process Mapping (BPMN) | Stakeholder Management | Qualitative & Quantitative Analysis | Institutional Research | Agile & Scrum | UAT & Requirements Traceability | SQL | Power BI (DAX, Power Query) | Tableau & Tableau Prep | R | JIRA | Power Automate | GA4 (Google Analytics) | Advanced Excel | Banner | Workday | Argos

PROFESSIONAL EXPERIENCE

3+-plus years turning business questions into requirements, data models, and dashboards — across government, higher education, and financial services.

California Department of Transportation (Caltrans), District 4, Fairfield, CA

Jan 2026 – Present

Analyst II, Business & Data Analyst

- Led requirements gathering sessions and stakeholder workshops with field operations, maintenance teams, and executive leadership, partnering with 50+ stakeholders to define project scope and priorities.
- Owned backlog refinement, sprint planning, and requirements traceability for cross-functional automation projects, translating business requirements into epics, user stories, and development-ready specifications.
- Performed current-state and future-state process analysis to identify automation opportunities, reducing manual reporting effort by approximately 12 hours per week.
- Developed SQL-based data profiling and analysis solutions supporting resource allocation across maintenance regions serving the Bay Area.
- Tracked highway maintenance project lifecycle across state-gate approvals, execution, and maintenance phases to keep projects on schedule.
- Designed and implemented Power BI, Power Automate, and Power Apps solutions that improved visibility into operational KPIs and supported data-driven decision-making.

KeyBank, Brooklyn, OH

Jul 2025 – Jan 2026

Service Specialist I

- Analyzed customer financial profiles and lending data to support accurate credit and lending decisions, ensuring compliance with policies.
- Investigated transaction patterns and collaborated with fraud prevention teams to identify potential risks and escalate suspicious activities.
- Performed root cause analysis on customer account issues, resolving discrepancies and improving service delivery through data-driven problem-solving.

Ashland University, Ashland, OH

May 2023 – May 2025

Business Intelligence & Data Analyst

- Led requirements discovery sessions with academic and administrative stakeholders to document business rules and reporting requirements for enterprise reporting initiatives.
- Researched student enrollment and course data to build performance metrics for admissions and student life; authored a data cookbook documenting reporting definitions.
- Created user stories, acceptance criteria, and functional specifications supporting development of retention, graduation, enrollment, and institutional effectiveness dashboards.
- Conducted gap analyses between existing reporting processes and stakeholder requirements, recommending scalable BI solutions that replaced manual reporting activities.
- Developed predictive enrollment forecasting models using historical enrollment data, providing leadership with actionable projections.
- Led User Acceptance Testing (UAT) activities, validating business rules and ensuring reporting outputs aligned with stakeholder expectations.

Cricket Wireless / Delphos Wireless, Ashland, OH

Feb 2021 – Apr 2023

Retail / Territory Sales Manager

- Analyzed territory performance data and business KPIs to identify sales trends, operational risks, and growth across multiple locations.
- Managed digital engagement and promotional design, using GA4 (Google Analytics) to track campaign metrics and inform marketing decisions.
- Developed recurring performance reports and dashboards that improved visibility into promotional effectiveness, then conducted variance analyses against targets to enable timely corrective actions.
